CEREMONIES WITHIN YOUR CEREMONY

Sand Ceremony

Sand Ceremonies are outdoor versions of the Unity Candle. The grains of sand represent individuals being united in family, plus all the talents and love they bring to the family. Vials of colored sand, one color for each participant, are poured into a large artistic glass container. Some couples choose shadow boxes, vases, or bottles that can be kept as keepsakes. Some couples use sand collected from a birthplace or from where they became engaged.

When the sand represents several children, or an extended family, each person may lay down a layer of solid color to display the heritage upon which this family is built. Once that is complete, a top layer of blended colors is poured as everyone participates simultaneously.
